

Christ Church Worship Arts Staff

Our Toolbox

This list includes all the tools that the worship team at Christ Church use to plan and complete tasks.

Planning

Planning Center Online - <http://planningcenteronline.com> Great tool for scheduling volunteers, planning service flow, and storing MP3s and chord charts. *Also check out <http://servicebuilder.net/> and <http://fqworship.com/>*

Dropbox - <https://www.dropbox.com/> This works online and syncs with multiple computers. Think of it as a folder on your computer and when you put a file in it, it shows up in the same folder on someone else's computer. This has been a great tool for us to bounce ideas for graphics, music, video, you name it around between different players.

Evernote - <http://www.evernote.com/> - Their main page says "Remember everything." It is a go-to tool for recording ideas.

Video/Sermon illustrations

Sermon Spice - www.sermonspice.com - Find short video clips by topic to illustrate sermons as well as backgrounds or still images for lyric projection.

Worship House Media - www.worshiphousemedia.com - Same concept as above.

Wing Clips - www.wingclips.com – movie clips for sermon illustrations

Presentation Software

ProPresenter - <http://www.renewedvision.com/propresenter.php> -Lyric projection software of choice. *Also check out <http://proclaimonline.com/> and <http://www.mediashout.com/>*

Copyright needs

www.ccli.com - permissions to show lyrics on screen

www.cvli.com - Christian Video Licensing International

www.copyrightsolver.com – Church Copyright Solver

Sheet Music

www.praisecharts.com
www.sheetmusicplus.com
www.musicnotes.com
www.ccli.com
www.1christian.net/guitar

Drama

www.DramaMinistry.com

Scripture

www.BibleGateway.com - For easy “copy and paste” scripture options

Troubleshooting

Google - <http://google.com> - This may seem funny, but seriously we start here for all troubleshooting.

Church Soundcheck - <http://churchsoundcheck.com> - a great website for tech questions.

Stage Design

Google SketchUp - <http://sketchup.google.com/> - Free 3D modeling software. We have built our stage in this 3D modeler and can move stage pieces around to make sure they fit.

“Contemporant” Video - <http://www.youtube.com/watch?v=HlyvLzlcTBc>
